

A PHI Company

March 14, 2016

Dear Customer:

Atlantic City Electric is continuing the process of installing underground transmission lines on 95<sup>th</sup> Street in Stone Harbor. Last Friday, the contractor completed the conduit installation at the intersection of 95<sup>th</sup> Street and Third Avenue. We will continue to move westward to a location where a manhole will be installed near the Horizontal Directional Drilling (HDD) site.

Beginning this week, a temporary above ground water system will be installed around 9425 Sunset and 388 to 395 95<sup>th</sup> Streets. This temporary work will entail installing a two inch yellow PVC pipe and ¾ inch orange hose at the edge of the curb and on the public right-of-way. This temporary system will be operational for approximately a month.

To activate the temporary water system, the contractor will have to interrupt water service from the bridge at 96<sup>th</sup> Street to 94<sup>th</sup> Street and Sunset Drive and from the bulkhead on 95<sup>th</sup> Street to the 9500 block of Third Avenue. This water interruption will occur on Thursday, March 17. The water service will be interrupted on 95<sup>th</sup> Street from approximately 8:00am to 12:00pm and on Sunset Drive from approximately 10:00am to 3:00pm. Please review the Borough website for any schedule changes.

Regarding the HDD process, starting approximately March 21, the contractor will excavate the area where the HDD pit area is currently exposed. The manhole is expected to arrive March 21 and be installed within a couple of days. Hammering noise will be sporadic for a couple of days to remove the HDD equipment. This excavation will last approximately one week depending on weather conditions.

After the conduit is installed to the manhole and the HDD casing is completed, the next phase is the installation of the electrical cables to the manhole from the riser pole from the 200 block of 95<sup>th</sup> Street to the manhole on the 300 block of 95<sup>th</sup> Street near the HDD drill site.

For the safety of our employees, contractors and customers, road closures, lane closures and traffic diversion will be required throughout this process. At the completion of all construction, the pavement and surrounding landscape will be restored to existing conditions.

Please call Atlantic City Electric toll free at 855-567-7869 or email us at [peermontproject@atlanticcityelectric.com](mailto:peermontproject@atlanticcityelectric.com) with any questions or concerns. All inquiries will be responded to within 24 hours Monday through Friday. You can also visit [stoneharbornj.org](http://stoneharbornj.org) for additional updates on our Peermont Substation Project.

We will make every effort to minimize any impact or inconvenience to you. Thank you for your patience and understanding as we work to further enhance service reliability for Stone Harbor and the surrounding area.

Sincerely,

A handwritten signature in cursive script that reads "Ronnie Town".
