November 17, 2016

TO: Jill Gougher, Borough Administrator

FROM: Michael Koochembere, Construction Official

RE: Flood Protection Assistance

Residents can obtain information on flood protection assistance from the Borough of Stone Harbor Construction Office. Flood protection assistance may include site-specific flood and flood related data, data on historical flooding in the neighborhood, and sources for financial assistance.

The Construction Office offers property protection 1-on-1 advice, such as retrofitting techniques and drainage improvements. A site visit may be required in order to properly evaluate the property before providing advice. The Borough will provide financial assistance advice (FAA) on certain financial assistance programs that may be available through Federal, State, and County governmental entities. This advisory service is part of the Borough's Program for Public Information (PPI).

The Construction Office Personnel are qualified to provide all aspects of Flood Protection Assistance available. I have completed EMI Courses and Raymond Poudrier is a Certified Flood Plain Manager. The Borough has a staff through our Engineering Office that are certified and available to answer questions as well.

Flood Protection Assistance Notification is publicized on our website and posted in our Borough newsletters and included in a mailing to all homeowners twice a year.

Michael Koochembere
Borough of Stone Harbor Construction Official
