**DISCUSSION:**

## Beach School Proposal

Dear council members,

We are submitting this proposal to the Borough of Stone Harbor in hopes to operate out of the facilities of the Recreation Department. The facilities would be used to provide cooking classes and oceanography classes to children between the ages of 7 and 13. The cooking classes will be taught by Caroline McGuire, and I, Brett Haenn, will be teaching Oceanography.

It is clearly evident that there are many more families staying in Stone Harbor this fall then during previous years. When we heard that the local school was not accepting any more students and that many parents were turning to homeschooling, Caroline and I decided to offer up our services to friends and colleagues to help supplement child education and hopefully help parents with their time management. So far, we have received a lot of interest and great feedback. We know this is late notice, however it is a very recent endeavor. We would really appreciate your sincere consideration because we know these classes will not only bring tons of joy to the local children, but will also give us the opportunity to have a positive impact on our community.

We will also be following and practicing the COVID-19 guidelines and policies provided by the CDC.

Thanks for your time,  
Brett Haenn & Caroline McGuire
